

CASE STUDY

Delivering Security-Cleared IT Talent for a Premier IT & Mission-Support Services Provider

CLIENT HIGHLIGHTS

Client: Premier IT & Mission-Support Services Provider

Industry/Sector: Information Technology

Location: Atlanta, Georgia

Client Overview

Our client is a **HUBZone, SDVOSB, WOSB, and SDB-certified** provider of IT and mission-support services for the **Department of Defense (DoD), the Intelligence Community, and National Security agencies**. Specializing in cybersecurity, cloud computing, big data analytics, systems engineering, and CMMC compliance, our client helps government organizations navigate evolving technology and security challenges.

With a commitment to excellence and innovation, our client delivers **mission-critical IT solutions** through a highly skilled workforce and competitive pricing. Their focus on hiring top talent ensures both client success and operational efficiency.

Our client urgently needed a TS-cleared Front-End Developer to meet a critical government project deadline. The project demanded rapid hiring without compromising on quality or compliance. To address this, client partnered with CCS Global Tech, a proven staffing and IT solutions provider with over 25 years of experience in **delivering top-tier, mission-critical talent**. CCS Global Tech maintains one of the industry's **largest proprietary databases of pre-cleared professionals**, with 85% of candidates pre-interviewed for technical and compliance fit.

The Challenge

Finding **security-cleared IT professionals** for government contracts is challenging due to limited talent, fierce competition, and lengthy vetting processes. Our client needed a **Front-End Developer** with an active Top Secret (TS) clearance to support a secure application rollout. Historically, hiring for such roles took 90 days, risking project delays.

CCS Global Tech, with over **25 years of experience**, stepped in to deliver a **pre-vetted, TS-cleared Front-End Developer**, ensuring compliance and meeting tight deadlines. While this engagement focused on one role, CCS Global Tech maintains a talent pool of IT specialists, including **DevOps Engineers, Network Engineers, Database Administrators, and Cloud Architects**, all with active security clearances for future needs.

The Solution

CCS Global Tech utilized its extensive staffing expertise and comprehensive candidate network to meet our client's requirements. By leveraging a pre-vetted pool of security-cleared IT professionals, CCS Global Tech implemented a highly efficient recruitment process, ensuring both speed and precision in talent acquisition.

- **Candidate Sourcing:** Utilized a comprehensive database of cleared professionals, actively maintained and updated to reflect current clearance statuses and skill sets.
- **Rapid Vetting:** Conducted thorough background checks and technical assessments to ensure compliance with government standards and alignment with our client's project needs.
- **Custom Matching:** Assigned a dedicated account managers to collaborate with our client, ensuring that the candidate met both technical specifications and clearance levels.
- **Scalable Support:** Prepared a pipeline of diverse talent for ongoing and future staffing demands, covering roles from network engineering to cloud architecture.

This proactive approach allowed CCS Global Tech to reduce our client's hiring timeline while maintaining the highest standards of quality and security.

Results

The partnership between CCS Global Tech and client delivered exceptional outcomes:

- **Reduced Hiring Cycle:** Cut the average hiring timeline from **90 days to just 30 days**, enabling our client to **meet critical project deadlines without delays**.
- **Rapid Placement:** Successfully placed a Front-End Developer with an **active Top Secret (TS) clearance**, ensuring the on-time rollout of a **secure application** for a key government client.
- **Client Satisfaction:** Strengthened our client's ability to deliver on government contracts, earning **praise for responsiveness, reliability, and expertise**.

CCS Global Tech quickly and accurately met our client's federal staffing needs, allowing them to focus on serving their government clients effectively.
